

Thursday, April 29, 2010		
18:00	Walter Best Heimbach, Düren	Welcome
18:15	Matthias Wessling AVT, RWTH Aachen	Microstructuring membranes
19:00	Dick Broer TU Eindhoven/NL	Monodisperse micro- and nanoporous membranes fabricated by holography and liquid crystal polymer technology
19:45	Dinner	
Friday, April 30, 2010		
9:00	Jürgen Vogt CIBA VISION, Grosswallstadt	Silicone hydrogels as contact lens materials: gas and ion transport properties
9:30	Jörg Vienen Fresenius Medical Care Deutschland, Bad Homburg	Medicinal drugs and dialysis membranes: enemies or partners?
10:00	Ahmed Mourran DWI, RWTH Aachen	Porous inorganic films by templating block copolymer complex
10:30	Coffee Break	
11:15	Wolfgang Meier Universität Basel	Biomimetic membranes with selective permeability
11:45	Sabine Kutschke Forschungszentrum Rossendorf	Filtration material inspired by microorganisms
12:15	Torsten Brinkmann GKSS, Geesthacht	Development of membrane processes - from material to pilot plant
12:45	Lunch Break	
13:45	Horst Maier IPAK, RWTH Aachen	Ceramic membranes
14:15	Oliver D. Conradi 3M Deutschland, Neuss	Polyelectrolyte membranes for fuel cell applications: material concepts and in-situ characterisation
14:45	Harald Ehrentraut Freudenberg Forschungsdienste, Weinheim	Fuel cell humidification with semi-permeable hollow fibre membranes
15:15	Closing Remarks - End of the Symposium
